

TURN YOUR ARCHIVE INTO ACTIVE KNOWLEDGE

ZONTAL

ONE PLATFORM

ZONTAL Space is the first Information Lifecycle Management platform, that standardizes scientific and non scientific data in one platform leveraging Data as an Asset – FAIR and ready for Reuse in Data Analytics.

PLATFORM CONCEPT

Process specific archive configuration

Robotics process automation

Seamless regulatory compliance

Fueling the capabilities of ML & AI

One platform fits all needs

Multi tenant collaboration

FAIR to your data

Vendor agnostic through standard formats and Open APIs

FAIR = Findable, Accessible, Interoperable, and Reusable

FROM DATA CAPTURE THROUGH ARCHIVING TO DATA ANALYTICS

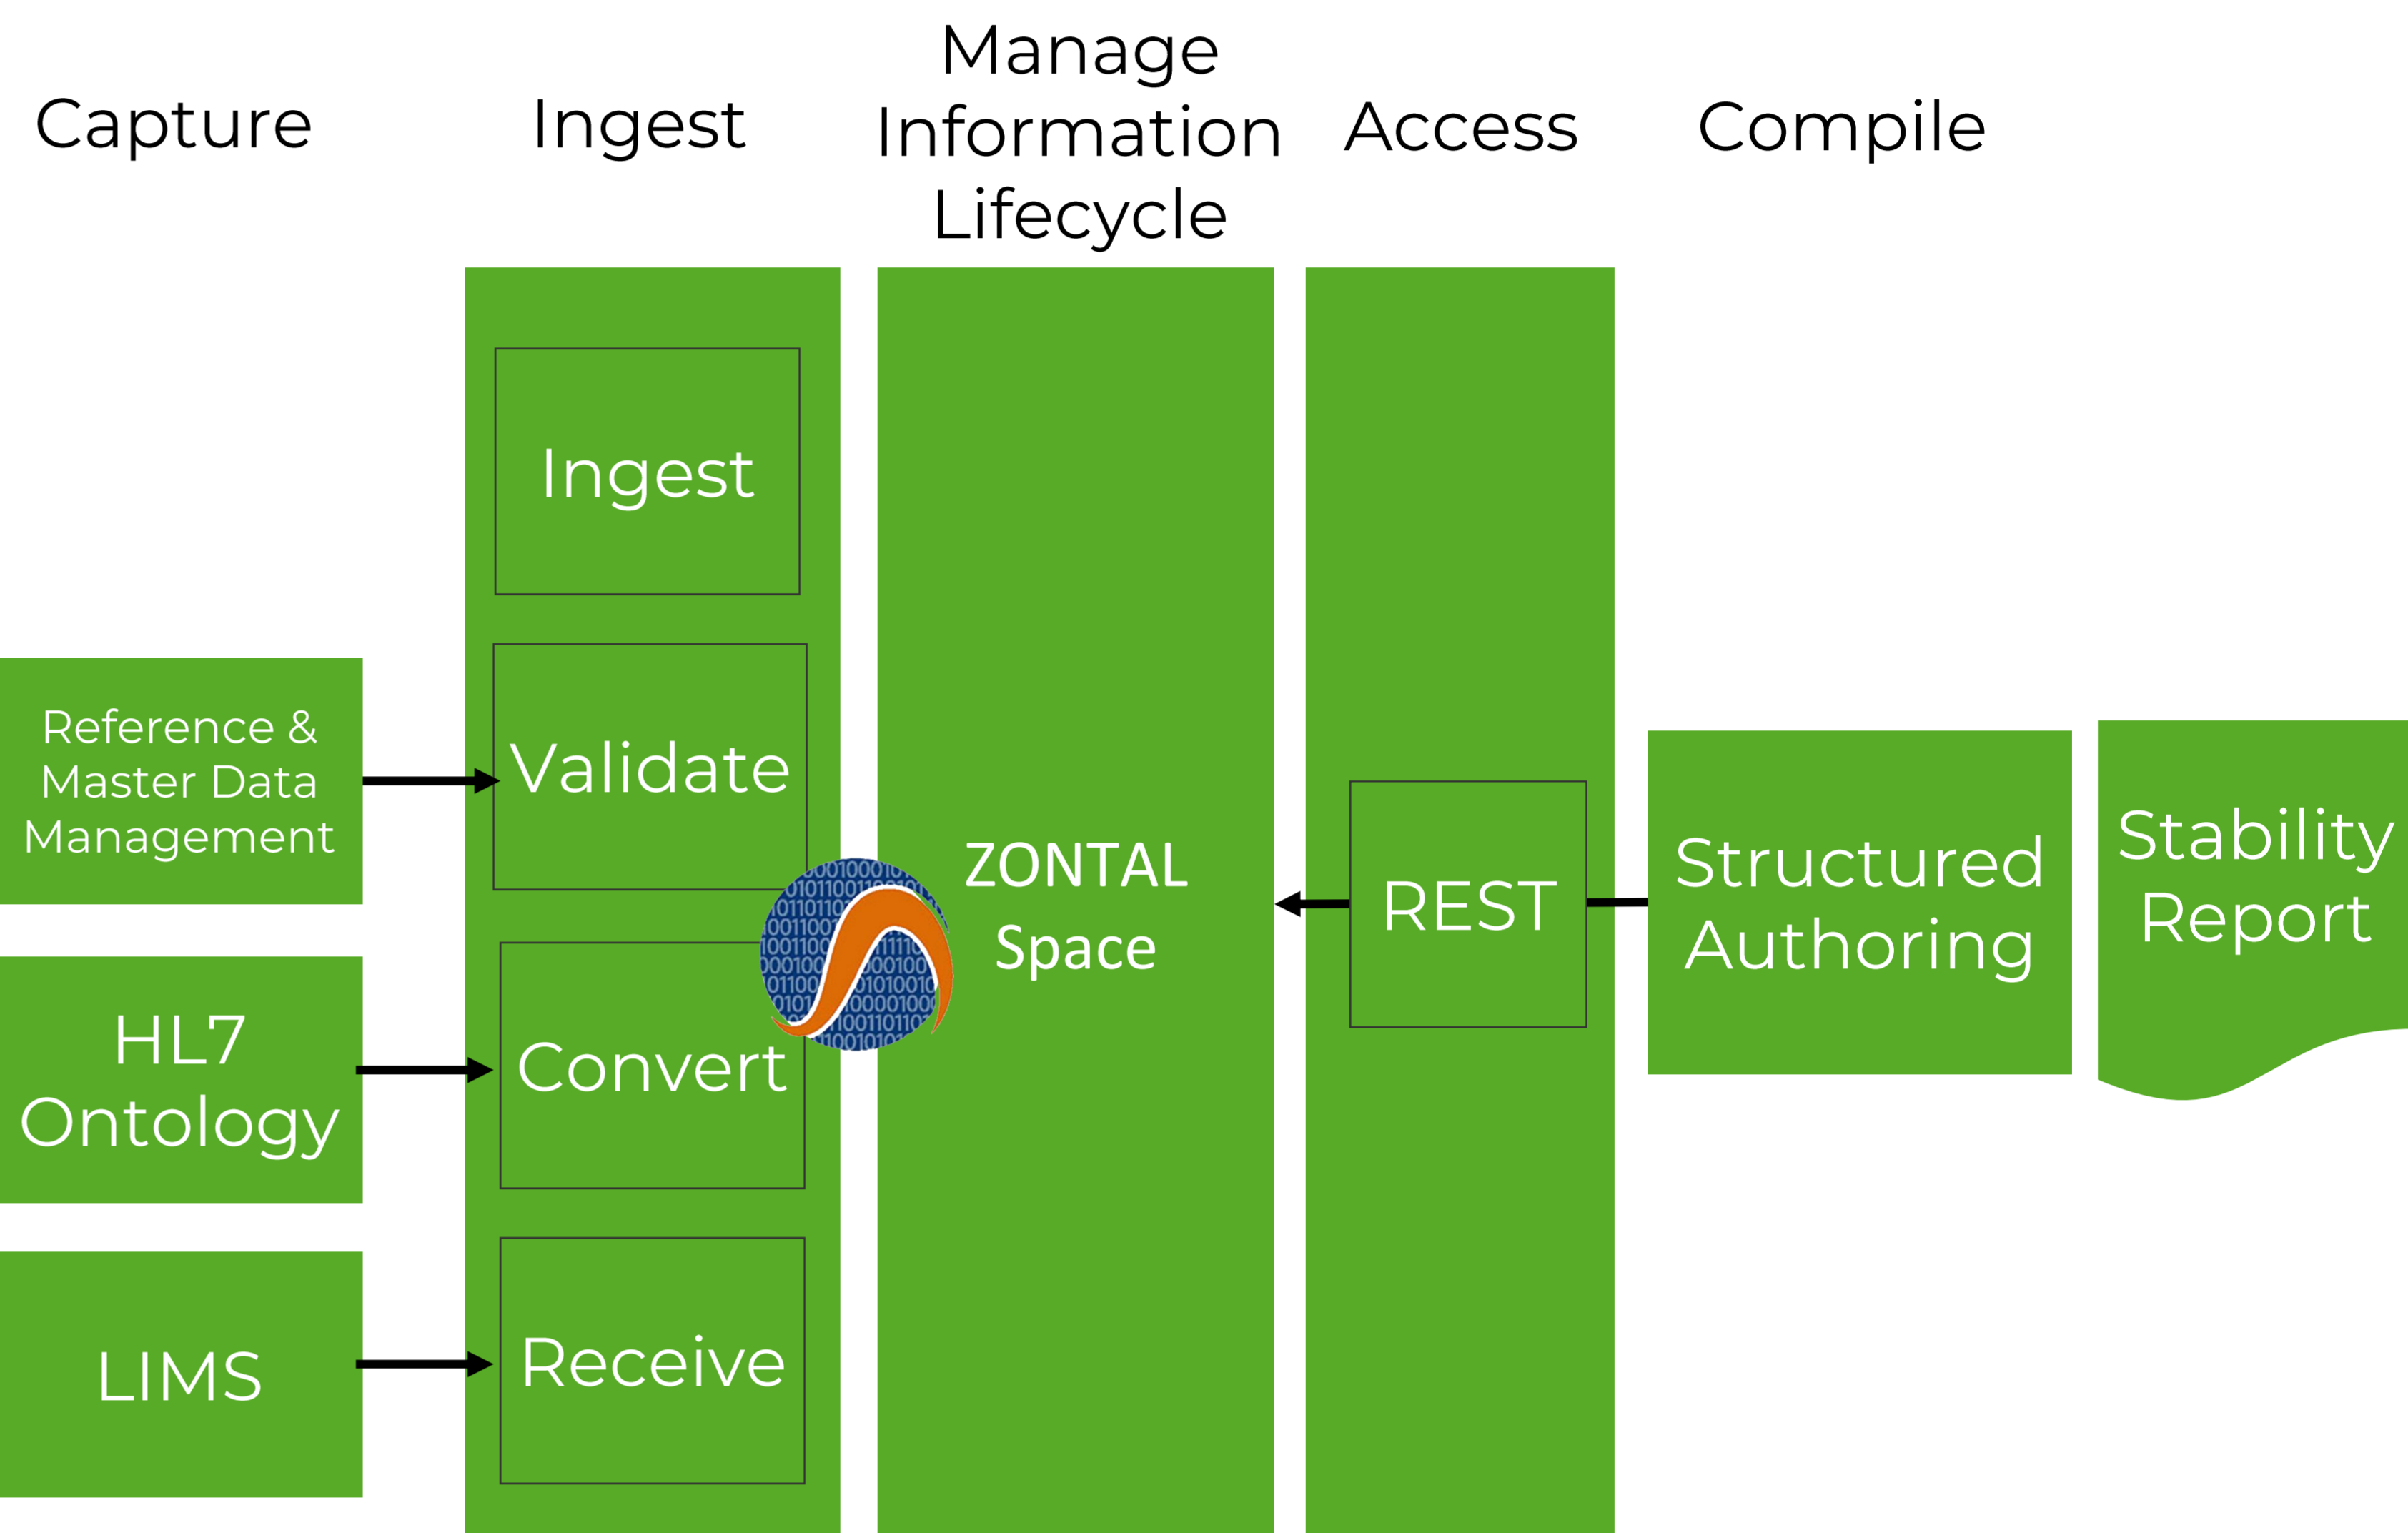

CASE STUDY

Data Analytics from Discovery to Manufacturing

CASE STUDY

Generating Reports Leveraging ADF as a Vendor Neutral Content Format

Conversion of HL7 data into ADF

Using a Structured Authoring System: Open API interface to ADF for creating Stability Reports

Now reduced: the effort required to prepare, compile and analyze content as well as documents

- Enhance and accelerate document preparation
- Anticipate roadmap for strategic documentation
- Meet documentation requirements across the entire product lifecycle
- Create a structured library of product-specific content for intelligent reuse

The result: innovative, strategic solutions for global lifecycle documentation

The Path to Advanced Data Analytics
